

We own and operate 4 small market radio stations in South-Central VA and North-Central NC. We are responsible broadcasters, and have never been a party to this current wave of indecent broadcasting that has swept our country. We struggle to pay our bills and our employees on a daily basis. We provide a vital service to our communities of license, and links between the citizens in our area and emergency services during times of disasters, man-made or natural. Money we will be forced to spend on equipment to record our broadcast everyday will take away money we can use for something more vital. You know who the offending parties--fine 'em, take away THEIR licenses, but don't penalize me, and our employees for their actions. You are treating the symptom, not the cause. Face up to YOUR responsibilities, go after the offending parties in a timely and realistic manner, and this problem will go away.
